

Training And Education

Flexible Quality, Environment and Safety Training

About GCC

Global Compliance Certification (GCC) is a leading independent certification body for Quality, Safety, Environment, Information Security, Food Safety and other Management Systems accredited by JAS-ANZ (Joint Accreditation System of Australia and New Zealand).

GCC provides its value-added certification services to the Government, Public and Private Sector Organizations. We are a professional organization backed by a team of trained, quality conscious, experienced auditors & technical experts.

About our Training Courses

At Global Compliance Certification (GCC) we believe training is an important asset to your business. We provide a range of online **Quality, Environment and Safety** training courses for companies and individuals who are interested to invest and learn about the management system and compliance.

Our courses are based on the latest standards, regulations, best practices and are delivered online, where you can complete the training on your own pace. We have tailored our courses to specific needs with flexible options and can be adapted to your requirements. Whether it's learning or sharpening your internal auditing skills, through to transitioning and updating yourself on new standards – we can help.

The following pages detail some of our existing courses, if you have any specific training requirements or require more information, reach out to us.

QUALITY MANAGEMENT ISO 9001

A Quality Management System (QMS) is the collection of policies, processes and procedures for planning and executing the core business areas of your organisation. ISO 9001 is the most widely used and implemented quality management system in the world.

Our experienced and highly qualified team of auditors offer a range of training options to suit organisations of all shapes and sizes. Our online, flexible training includes our exclusive 2-hour introductory sessions, through to Exemplar Global Recognised Lead Auditor programs.

ENVIRONMENTAL MANAGEMENT ISO 14001

An Environmental Management System (EMS) provides the structure for organisations to plan, organise and implement strategies and practices that minimise environmental liabilities, use resources more efficiently, decrease waste and understand the environmental impacts of their business activities.

Our flexible, ISO 14001 online training programs provide organisations with the skills and knowledge they need to develop and implement Environmental Management plans, policies and processes. With courses from our exclusive 2-hours introductory sessions through to Exemplar Global Recognised Lead Auditor programs, there is something to suit all organisations.

ONLINE AND SELF-PACED LEARNING

- All our courses are online and self-paced to fit around your schedule. You can revisit digital content at any stage of the course duration.

RESOURCES INCLUDED

- Tailored fun videos
- Downloadable forms, templates and sample documents and guides you can use
- Practical and easy to follow quizzes

INTERNATIONAL RECOGNITION

- Our courses are based on international standards, and our organisation is a leading international provider of management systems training.

OCCUPATIONAL HEALTH AND SAFETY ISO 45001

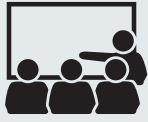

Occupational Health and Safety (OH & S or OHS) systems help organisations protect their staff and fulfill their legal obligations to provide a safe and healthy work environment. The ISO 45001 standard has been introduced to help organisations identify and manage risks to health and safety in the workplace, and provides guidelines for the required policies, plans and processes that are required to manage workplace health and safety.

Find flexible online learning options for all levels of experience, from introductory sessions to Exemplar Global Recognised Lead Auditor programs. Our experienced and highly skilled trainers ensure that each course is packed with practical and relevant information to give you the skills you need to work with OHS systems and ISO 45001.

INTEGRATED MANAGEMENT ISO 9001, ISO 14001, AND ISO 45001

The Integrated Management Systems training covers ISO 9001 Quality Management Systems, ISO 14001 Environmental Management Systems, and new ISO 45001 Occupational Health and Safety Standards. These three management systems can be used to create an integrated and streamlined approach to managing risk and implementing management systems.

Choose from our range of flexible study options with our exclusive 3-hour introductory courses and range of internationally recognised Exemplar Global Recognised Internal Auditor and Lead auditor programs.

By completing our Introduction to Management Systems course, you will learn the basics, key features and practices of the ISO Standard and help prepare your organisation for third-party audit. Organisations will benefit from this course if they are at the start or middle of their certification journey or would like a refresher on the standard requirements. People who will benefit from this course include Directors, Owners, Senior Management, Co-ordinator's, and Supervisors.

Resources included:

- Several tailored fun videos
- More than 15 download forms and sample documents and guide you can use
- Practical and easy to follow quizzes
